The first beer produced with the Sun of Naples

The brewery boasts **a cutting-edge production system with 4.0** technologies, perfectly interconnected, ensuring constant quality control throughout the entire production process and the preservation of the beer's taste over time, while maintaining its organoleptic properties.

A **150 kW photovoltaic system** makes the entire production sustainable and zero-impact, and there is an outdoor area dedicated to the treatment and sanitization of wastewater. Incoming water is treated through reverse **osmosis systems** that reduce conductivity and hardness, eliminating potential contaminants and improving the water's characteristics for the production processes.

ORO

4,8% vol.

- Colore oro brillante
  Bright gold color
- Delicato aroma floreale
  Delicate floral aroma
- Equilibrato, leggera amarezza
  Balanced taste, slight bitterness
